JON K. WILLIAMS

TECHNICAL OPERATIONS & STRATEGIC PARTNERSHIPS LEADER | FOUNDER & CEO

Spokane, WA | Remote | 503-310-0639 | jon.k.williams.711@gmail.com
jonwilliams.xyz | github.com/Jonny-Ringo

PROFESSIONAL PROFILE

Technical operations leader and business founder working at the intersection of executive strategy, engineering, and customer experience. Collaborates directly with founders and senior leadership on strategic relationships, grants, technical assistance, and complex operational decisions. Combines cross-functional leadership with hands-on development, infrastructure troubleshooting, analytics, and AI-assisted workflows. Experienced supporting technical ecosystems with communities exceeding 80,000 members.

LEADERSHIP & TECHNICAL STRENGTHS

Executive & Founder Relations • Strategic Partnerships • Technical Customer Success • Cross-functional Operations • Software Development • Incident & Escalation Management • AI-assisted Automation • Analytics & Infrastructure Monitoring • Developer Onboarding

PROFESSIONAL EXPERIENCE

Staff Officer & Community Lead | Forward Research / AO & Arweave Ecosystem | 2024–Present

- Serve as a key point of contact for ecosystem founders seeking grants, partnerships, or technical support; work directly with Forward's Founder/CEO and coordinate with engineering and executive stakeholders.
- Discuss potential agreements and strategic initiatives with external project leaders; translate business needs into engineering engagement, operational follow-through, and clear next steps.
- Coordinated secure handoffs of sensitive technical information between engineering teams and external partners to support resolution of high-value digital asset and infrastructure issues.
- Lead technical support and escalation across protocol, wallet, exchange, infrastructure, and developer issues; investigate root causes and coordinate solutions with partner and internal teams.
- Build ecosystem monitoring and analytics tools, manage operational reporting endpoints and third-party listings, and contribute scripts, documentation, and pull requests for developer tooling.

Founder & CEO | DA Operations (formerly DAO Academy) | 2021–Present

- Founded and operate a technical customer support and community operations business serving digital products and ecosystems, including communities of more than 80,000 members.
- Own service design, client relationships, operational delivery, and cross-platform support programs spanning onboarding, escalations, moderation, reporting, and community initiatives.
- Develop automation, AI-assisted knowledge workflows, analytics, and operational reporting that surface user friction and connect support insights to product and engineering priorities.
- Provide hands-on technical investigation and troubleshooting, carrying issues through documentation, engineering collaboration, and resolution where possible.
- Selected ecosystem experience: Sarcophagus, Polkadot, Decent DAO, Arweave, and AO.

SELECTED TECHNICAL PROJECTS

The Eye — Built and maintained ecosystem analytics and monitoring dashboards tracking developer activity, transactions, infrastructure health, and node/network signals, including a 3D node visualization.

Arweave App / Permaweb Analytics — Designed client-side application event tracking backed by permanent data storage and GraphQL querying, reducing reliance on external analytics services.

AOction House — Developed an auction platform with HTML, CSS, JavaScript, and Lua, supporting listing, bidding, refunds, settlement, and asset-transfer flows.

EARLIER ENGINEERING & SUPPORT EXPERIENCE

Vacuum Systems Engineer | Intel | Dec 2019–Nov 2021

- Diagnosed and repaired semiconductor manufacturing equipment, coordinated parts and maintenance work, documented procedures, and trained teammates in a high-compliance environment.

Install Quality / Tool Move Operations | Retronix | Jun 2019–Dec 2019

- Coordinated semiconductor equipment installations and relocations with Intel engineers, checked utility and blueprint requirements, and managed equipment and parts inventory.

Tier 1 Specialist → Tier 2 Supervisor | KellyConnect / Apple iTunes Support | Oct 2017–Aug 2018

- Promoted to Tier 2 to handle complex technical, account, and security escalations; coached Tier 1 representatives, coordinated engineering follow-up, and managed sensitive customer cases.

TECHNICAL CAPABILITIES

Development: JavaScript, Node.js, Lua, HTML, CSS, GraphQL, PowerShell

Systems & Infrastructure: Linux, Nginx, Git/GitHub, SQLite, DigitalOcean, Arweave, AO, HyperBEAM

Operations & Platforms: Technical troubleshooting, API/reporting endpoints, AI-assisted workflows, Discord, Telegram, X, Reddit, Farcaster, Notion, Trello, CoinMarketCap, CoinGecko

EDUCATION & TRAINING

Volkswagen Academy — VW Fast Track Certification (2018) | Anaconda Job Corps — GED & Heavy Equipment Mechanic Trade Certification (2008–2009)
